Al-Tarek Metal Industries

Steel & Aluminum Fabrication
In our effort to continuously provide best quality products and services on the market, our team unceasingly searches for the finest equipment and materials to be able to fulfill all possible customer needs, while eagerly searching for the latest and most advanced technology in the industry to efficiently manage those needs. Moreover, our close relationship with local and international suppliers makes it possible to procure a wide range of materials to provide all varieties of Steel and Aluminum works. Our team believes in long term and prosperous relationships with all stakeholders, customers, suppliers, clients and business partners. Al-Tarek Metal Industries has cultivated the ability to promptly respond to all current market needs. Further, we at Al Tarek Metal Industries have built and continue to live up to our established reputation as one of the most dependable steel fabrication firms in Qatar.

The company has accomplished various projects in the fields of civil, civil-mechanical, building construction, structural steel fabrication, installation, erection, painting, aluminum cladding, doors and windows, curtain wall and concrete repairs among others.
Company Policy
The Management of AL-Tarek Metal Industries is dedicated to achieving the highest possible standard on all projects, regardless of size, nature or complexity. Secret to our success lies in strictly obeying quality control procedures at all steps of the process from receiving the contract until handing over finished project.

Vision
AL-Tarek Metal Industries’ aim is to become recognized leaders in design, fabrication and installation of Steel and Aluminum Products in all varieties while strongly following standards of Qatari Law.
Our Services
Fabrication Shop
We undertake all types of steel Fabrication work such as industrial steel works, Warehouses, Offshore Baskets, Skip Bins, Spreader beams, Various types of Tanks, Cylinder racks with Manifolds, Portacabins, Car parking sheds, Container Houses, Handrails, Steel Doors, Stairs and Cat walks and all kinds of customized fabrications as per customer’s need.

Al Tarek Metal Industries facility has more than 1,000 square meters of work space located in Industrial Area. The workshop is equipped with Welding machines (electric), Generators, Drilling Machines (Stand, portable, Magnetic), Grinding units, Cutting units (Gas & Motorized) and all types of pneumatic, Electric and Hand tools.
Office Containers and Portacabins
We fabricate different types of Portacabins, Office Containers, Container Storage Systems and Toilet Containers any size and shape to suite customers need.

Sand Blasting and Painting
The workshop has an area set up for specifically for Sandblasting & Painting works. In addition our engineers can do other activities to match the client’s requirements and specifications.

Aluminum Fabrication
Al Tarek Metal Industries handle fabrication of aluminum curtain walls, doors, windows, cabinets, glass partitions and many others.
Manpower
Our manpower consists of skilled and experienced Engineers, Quality Controllers, Supervisors, Fabricators, Welders, Blasters, Painters and Laborers.

Equipment
The equipment and machinery are regularly checked to maintain efficiency and productivity. Results of routine and emergency scheduled checks and inspections are properly kept and filed for reference. Each year our equipment and machinery are subjected to total testing and inspection to determine their compliance to standards. Our aim is to maintain the highest quality of excellence in all our products and services.
Clients
A reputable list of companies and government agencies constitute our most distinguished client database.

Quality Policy
AL-Tarek Metal Industries’ Quality Policy is to provide customer satisfaction through the application of a Quality Management system to meet customer requirements and exceed their expectations.

Quality Management System
Quality Management System of the steel workshop is currently established to meet the individual client’s requirements. All quality documents and records regarding projects are controlled by AL-Tarek Metal Industries trained staff. Project Management and Reviews are conducted by Noors Engineering Quality Division.
Quality Procedure
The latest QCS standards are followed in:
- Material Submission
- Preparation of Method Statements
- Inspection and Test Plans
- Processes of fabrication, Material Handling, Storage and Stocking
- Inspection of vertical and horizontal stability of erected steel structures
- Management of Access along beams/others (i.e. Scaffold, Life Line)
- Management of PPE, Safety Nets, Belts, Etc.
- Final Inspection
